

DIGITAL CONTENTS DELIVERY SYSTEM

Patent number: JP2002279205 (A)

Publication date: 2002-09-27

Inventor(s): YAMAZAKI YASUHIRO +

Applicant(s): SANYO ELECTRIC CO +

Classification:

- international: G06F12/14; G06F15/00; G06F21/00; G06F21/24; G06Q30/00; G06Q50/00; G10K15/02; H04L9/32; G06F12/14; G06F15/00; G06F21/00; G06Q30/00; G06Q50/00; G10K15/02; H04L9/32; (IPC1-7): G06F15/00; G06F17/60; H04L9/32

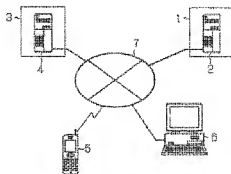

- european:

Application number: JP20010075637 20010316

Priority number(s): JP20010075637 20010316

Abstract of JP 2002279205 (A)

PROBLEM TO BE SOLVED: To make a person who does not own the digital contents able to provide digital contents to third parties while protecting the copyright of the owner of the contents. **SOLUTION:** A contents receiver accesses the homepage of a delivery management server 2 from a cellular phone terminal 5 to request music software or the like. In response to this, the delivery management server 2 transfers that request to a digital contents management server 4. The digital contents management server 4 directly transmits the music software to the requesting terminal 5. In that case, the delivery management server 2 transmits a specific authentication code to the terminal 5 and the management server 4, which in turn transmits the music software after checking the authentication code received from the management server 2 against the authentication code received from the terminal 5.
